Reach For The Purple Pad

STAY DriPAD™ Super Absorbent Pads

... Keeps Your Patients Dry, *and* Controls Bacteria and Odors

DriPADs are disposable absorbent crate liners that keep animals dry, even after several urinations. An antimicrobial agent controls bacteria and odors, and a water-proof barrier bottom keeps the crate dry.

When your patients are incontinent, You can help keep them dry when you reach for the Purple Padit's a high performance STAY DriPAD!

Distributed By:

When your patients are incontinent or need to be confined in their crate for longer periods of time - pull out the Purple Stay DriPADs. Keep their fur dry - better manage their temperature, temperament, and their comfort. Don't settle for shreds of wet newspaper on the animal and throughout the crate.

DriPADs' proprietary surface is one-way - urine passes through the surface into the absorptive core, but not back out - so your patient stays dry. And the super absorbent core has an EPA registered Antimicrobial Agent added to it to control bacteria and to reduce odors, even after hours of use.

No pad on the market cares for your patient as well as a DriPAD. Here's how they are used:

- Post surgical care.
- Infectious Animals.
- Animal Transport.
- Overnight crating and boarding.
- Puppies and Elderly Animals.
- Whelping Pad.

DriPADs are:

- Crate Liners
- Birthing Pads
- Super absorbent
- Non-woven
- Disposable
- STAY-Dri Surface
- Low Skid Barrier Backing
- Available in two sizes:
 - 23" X 24"
 - 23" X 48"

DriPADs contain an antimicrobial agent to control bacteria and odors within the pad.
